DIFFERENCE  
TOMORROW*

## What's the Plan?

Albert's Heating and Air Conditioning's Security Plus Protection Plan (SPP) is a service that regularly maintains your furnace and air conditioning equipment to ensure safety, efficiency, and keep it in top working order. It's a plan to prevent problems before they occur, ultimately, minimizing expenses with additional benefits.

## What Does SPP Include?

- Inspection of equipment including flue pipes, condensate drainage and hoses, heat exchanger, blower, and venter motor.
- Carbon Monoxide Testing
- Clean and adjust burner assembly
- Clean ignition assembly
- Replace oil filter/nozzle or elements
- Monitor chimney draft
- Adjust operating pressures and check refrigerant
- Test safety controls
- Clean and adjust blower components
- Measure volts/amps on motors
- Lubricate all moving parts
- Adjust thermostat calibration and check batteries

- Check evaporative coil, clean condenser coil, and condensate drains
- Measure temperature difference
- Measure for correct air flow
- Inspect and tighten electrical connections
- 1" fiber glass filters
- Clean electronic air cleaner (if applicable)
- Replace filter and humidifier water panel (additional cost)
- Check capacitor

## Additional Benefits

- Priority service
- Reminder service and pre-season scheduling
- Reduced risk of catastrophe
- First served during severe weather emergencies
- Extended equipment life
- Improved efficiency
- Discount on parts and labor (10%)
- No diagnostic fee
